Mobile: (+84)898522510
Birthday: 25/10/2001
Address: Nguyen Van Ba Street, Thu Duc Ward, Ho Chi Minh City.

Education

Engineering Degree in Software Engineering — 2019 – 2023
DaLat University

Summary

- Fullstack Developer with 4 years of experience in systems analysis and software development, delivering robust web applications for 15+ clients. Engage in tech startup projects or initiate a personal project
- Proficient in C# (.NET Core 3.1 – .NET 10, Entity Framework), NodeJS, Angular, ReactJS, and databases including PostgreSQL, MySQL, SQL Server, and MongoDB, with expertise in RESTful APIs and JavaScript (jQuery).
- Strong skills in OOP, software design, and Agile Scrum, with a proven ability to solve complex problems and meet tight deadlines under pressure.
- Fast learner with a B2 English level (Efset 52), committed to mastering new technologies and aspiring to become a Technical Lead within 2 years.

Skills

- **Programing Languages :** C#, NodeJS , JavaScript, TypeScript
- **Database** : PostgreSQL, MySQL, SQL Server, MongoDB
- **Soft Skills:** Communication, Time Management, Problem-Solving, Fast Learner, Team Leadership
- **Frameworks/Platforms :** ReactJS, Angular, .NetCore, NestJS,entity framework, Entity framework, ASP.NET Core, EF Core, Angular Signals, Angular Material
- **Other:** VPS, SCSS, Tailwind, Ajax, Zalo Miniapp, REST API, Docker, Postman, Swagger, GraphQL, SignalR, LiveKit (WebRTC), RabbitMQ, GitHub Actions, MailKit
- Good experienced in software application.

Certifications

- **Foundational C# with Microsoft** (FreeCodeCamp, ID: fcc7795fa04 35de-4713-867a-2e93f435a6b7-fcswm)
- **Rest API** (HackerRank, ID: f9551c26cca3)
- **JavaScript** (HackerRank, ID: 3ea42ccb599b)
- **SQL** (Basic) Certificate (ID: bbae284bbe4b)
- **Certified SPA Supervisor** (CSS, ID: bbb6cf528)

Projects

1. **TeamFlow – Work & Operations Management Platform (Personal Project)**
   - Description: TeamFlow is an all-in-one work management platform that brings a company's daily operations into one place: workspaces, projects and Kanban tasks, timesheets and weekly plans, meetings with video rooms and recordings, and realtime chat and notifications. It also covers HR and operations, including leave management, performance reviews, internal requests, asset management and budgets, with a bilingual Vietnamese/English interface.
   - Built realtime collaboration with SignalR (chat, notifications, online presence) and video meetings with LiveKit (WebRTC).
   - Implemented HR workflows: leave with monthly accrual, performance review cycles with weighted scoring, goals/KRs and 360° feedback.
   - Added a security center with audit logs and database backup/restore; covered by unit, API and end-to-end tests.
   - Team Size: 1
   - Role: Fullstack Developer
   - Technologies: Angular 22 (Signals, Angular Material 3), TypeScript, .NET 10, ASP.NET Core, EF Core 9, MySQL, SignalR, LiveKit, MailKit, Docker
2. **User, Care Customer Management Website (PandaLoyalty) (3/2023 – 11/2025)**
   - Description: The PandaLoyalty system is a customer care platform and loyalty program management solution that helps businesses build and maintain longterm relationships with customers. Through point accumulation and rewards for purchases or other actions, customers can redeem their points for gifts. The system also integrates online payment, shipping, mini-games, and connects with multiple third-party services such as POS, KiotViet, and Zalo Official Account, making it easy for customers to use the platform through their mobile devices.
   - Successfully developed and deployed to over 15 customers nationwide.
   - Team Size: 5
   - Role: Fullstack Developer
   - Technologies: NodeJS, C# (.NET Core 3.1), MySQL, Docker, Zalo API, KiotViet API, QR Code Scanner, MVC, Swagger

3. **Plant Management Website (3/2024–7/2024 |5/2025 – 11/2025)**
    - Description: This is a system for monitoring the growth, location, area, and status of plants. After purchasing a product, customers will contribute a tree to help green the country. They will receive a tree code and activate their planted tree through the website. On the website, users can track their tree's growth, location, and images throughout its development. Additionally, they can read news about the company, its activities, and enjoy mini-apps on the platform.
    - Team Size: 5
    - Role: Fullstack Developer
    - Technologies: NestJS, Angular, C#, Tailwind, Postman, REST API, Zalo API

4. **Sale Miniapp (7/2024–12/2024)**
    - Description: This is a sales system that allows users to browse products, make purchases through the miniapp, pay directly via VNPay, and view purchase and payment history on the miniapp. The system includes several other features such as a shopping cart, online payment, delivery, price filtering, viewing personal information, product details, etc. The system is integrated with third parties like KiotViet, VNPay, Grab, and others.
    - Team Size: 4
    - Role: Fullstack Developer
    - Technologies: ReactJS, Postman, Docker, Zalo API, VNPay API

Work Experience

1. Company: Amaris Consulting

- **Location**: District 10, Ho Chi Minh City, Vietnam
- **Client / Onsite:** Bosch Powertrain Solutions, Long Thanh District, Dong Nai, Vietnam
- **Position**: Fullstack Developer
- **Duration**: April 2026 – Present
- **Description:**

1.1 Developed new web application features based on business requirements from Bosch Powertrain Solutions.

1.2 Investigated, fixed, and optimized existing system issues to improve stability, performance, and user experience.

1.3 Worked on both front-end and back-end development, including UI updates, API integration, business logic, and database-related tasks.

1.4 Collaborated with business users, internal teams, and cross-functional stakeholders to deliver reliable and maintainable software solutions.

1.5 Participated in code review, testing, debugging, and production support to ensure code quality and system reliability.

1.6 Maintained and enhanced internal web applications used for employee management, training course management, and factory operation support

2. Company: Sevago Careers

- **Location**: District Thu Duc, Ho Chi Minh City, Vietnam
- **Position**: Fullstack Developer
- **Duration**: November 2025 – April 2026
- **Description:**

2.1 Developed and optimized modern web applications using contemporary front-end and back-end technologies to improve system performance and scalability.

2.2 Participated in designing and implementing new system features aligned with business requirements and user needs.

2.3 Ensured code quality through code reviews, testing, and adherence to best development practices.

2.4 Collaborated closely with cross-functional teams to deliver reliable and maintainable software solutions.

3. Company: Aegona Company

- **Location**: District 12, Ho Chi Minh City, Vietnam
- **Position**: Fullstack Developer
- **Duration**: March 2023 – November 2025
- **Description**:

3.1 Collaborated with cross-functional teams, including designers, product managers, and QA engineers, to deliver high-quality software products within tight deadlines.

3.2 Developed and maintained web applications using modern front-end and back-end technologies, ensuring seamless integration and optimal performance.

3.3 Designed and implemented RESTful APIs to facilitate efficient communication between front-end and back-end systems.

3.4 Conducted code reviews and provided mentorship to junior developers to maintain code quality and foster team growth.

3.5 Led a small team of 4-5 developers as a TechLead, overseeing project planning, technical guidance to ensure timely delivery and alignment with project goals.

Career Goals

- Become a Technical Lead within 2 years
- Engage in tech startup projects or initiate a personal project
- Develop project management and team leadership skills

Interests

- Learn new languages, technologies, and frameworks
- Build and maintaining personal coding projects
- Problem-solve and algorithm challenges
- Attend tech meetups, workshops, and conferences

Languages

- English: B2
- Efset 52
